a
GO biological process
epidermis development
skin development
regulation of hormone levels
epidermal cell differentiation
external encapsulating structure organization
keratinocyte differentiation
extracellular matrix organization
extracellular structure organization
tissue morphogenesis
embryonic morphogenesis
keratinization
morphogenesis of an epithelium
muscle tissue development
hormone metabolic process
homophilic cell-cell adhesion
intermediate filament-based process
intermediate filament organization
intermediate filament cytoskeleton organization
skin epidermis development
cornification

b
KEGG pathway
Cornified envelope formation
Cadherin signaling
Neuroactive ligand-receptor interaction
PI3K-Akt signaling pathway
Cytoskeleton in muscle cells
Calcium signaling pathway
Focal adhesion
Integrin signaling
Protein digestion and absorption
ECM-receptor interaction
Bile secretion
Drug metabolism - other enzymes
Steroid hormone biosynthesis
Arachidonic acid metabolism
Retinol metabolism
